

C/APPLICATOR

CAAP-8100

12/PKG.

THE FLEXIBLE ALTERNATIVE TO BULKY BOTTLES.

DAVE BROWN PRODUCTS INC.

***NOW YOU
CAN PUT
YOUR C/A
GLUE
EXACTLY
WHERE YOU
WANT IT!***

- ***Flexible***
- ***Long shaft for hard to reach areas***
- ***Large C/A Reservoir***
- ***The thin, squeezable alternative to bulky bottles!***

INSTRUCTIONS:

To use, simply squeeze the large end flat, insert the open end of the C/Applicator into the nozzle of your bottle, making sure it is in the adhesive. Slowly release your pressure which will allow the adhesive to be drawn into the C/Applicator (similar to an eyedropper).

It is not necessary to remove the adhesive from the C/Applicator between uses.

For more precise use, grip the small end of the C/Applicator with a pair of pliers and firmly pull. This will stretch the nozzle making it a smaller diameter. Cut off the tip and it is ready to use.
