

Six Shooter REPLACEMENT TUBING KIT

DAVE BROWN PRODUCTS INC.

GLTK-2011
GLOW VERSION MADE IN USA

IMPORTANT!

Clean the nozzles thoroughly with alcohol before installing new tubing. (On Gas/Diesel version only, place foam tape along inside-bottom of the pump unit.) Crank the unit and if the tubing rides up and rubs the front rotation plate, twist the tubing by rotating the clips until the tubing doesn't ride up and rub. Put a drop of cyanoacrylate glue on the end of the fittings to insure that they don't pull off.
