

VIBRA-DAMP HUSH-CLAMP .40

for: 1³/₁₆" - 1¹/₂" dia. tuned pipes

DAVE BROWN PRODUCTS INC.

TO INSTALL YOUR HUSH-CLAMP:

Position Hush-Clamp near the tuned pipe's center of gravity.

When mounted to a wood surface, use $\frac{3}{16}$ " hardwood for mounting surface. Drill & tap mounting surface for 8-32 thread. Put thin CA glue in threads and re-tap.

(When mounted to a fiberglass, wall put thin CA glue in threads and use a 8-32 nut on the opposite side of the wall.)

Use included screw to fasten cradle to mounting surface.

Pre-stretch strap before using.

Allow $\frac{1}{8}$ " side to side clearance and $\frac{1}{8}$ " header to tuned pipe clearance when used with a soft engine mount.

A thin layer of silicon RTV between cradle and pipe will help insulate in high heat areas.
